SUMMARY

Laravel Developer with 1+ year of production experience delivering secure document processing systems and high-performance REST APIs. Reduced database query response times by 40% through indexing and optimization, and built multi-tenant applications with advanced RBAC implementation. Skilled in PHP, MySQL, Blade/Tailwind, and MVC architecture, with additional experience in the MERN stack.

EXPERIENCE

Web Developer

Jun '25 — Present

Devonsite

Lahore, Pakistan

- Architected and deployed 3+ production Laravel applications, implementing secure file processing workflows with encrypted storage and automated cleanup.
- Designed MySQL databases with proper indexing and normalized schemas; optimized multiple slow queries reducing response times by ~40% on large datasets.
- Applied MVC architecture with service layers for scalability, successfully debugging production issues and collaborating on client deliverables ahead of schedule.
- Implemented secure authentication and role-based access control for multi-tenant applications, maintaining a strict security record.
- Collaborated effectively with a 4-person development team using Git and Bitbucket workflows, conducting regular code reviews.

SKILLS

Backend Laravel, PHP, REST APIs, MVC Architecture, Node.js, Express.js

Frontend HTML, CSS, Javascript, Tailwind CSS, Bootstrap, Blade Template, React.js

Databases MySQL, MongoDB

Tools Git, GitHub, Bitbucket

PROJECTS

PDFToolBox – Laravel Document Processing Platform [Link](#)

- Developed full-stack PDF processing SaaS handling 1,000+ monthly conversions with merge, split, compress, and format conversion capabilities
- Engineered secure file handling system with SHA-256 encryption, temporary storage with 24-hour auto-deletion, and rate limiting
- Implemented service-oriented architecture separating business logic from controllers, significantly reducing code duplication by 50% across PDF operations
- Built responsive UI using Blade templates and Tailwind CSS, achieving high Lighthouse performance scores and mobile-first design

CV Builder [Link](#)

- Contributed to and refactored a production CV/Resume Builder built with Laravel and React.js, migrating the project from Laravel 9 to Laravel 12 and upgrading the frontend build system from legacy tooling to Vite.
- Redesigned the maximum UI by adopting Tailwind CSS across all pages, ensuring visual consistency, mobile responsiveness, and improved performance.
- Added new user-facing features and refactored the majority of existing pages, improving code quality and maintainability throughout the codebase.
- Leveraged AI-assisted development to work effectively with the React.js frontend, demonstrating adaptability and initiative beyond core Laravel expertise.

ToolsCase - Web Utility Platform [Link](#)

- Created modular web utility platform with 2+ tools including pdf converter, CV/Resume Builder, and QR generators, serving 150+ monthly active users
- Designed dynamic route system with middleware authentication supporting role-based tool access and optimizing reusable components for 30% faster backend performance

EDUCATION

Bachelor of Science in Computer Science, NCBA&E (GPA: 3.64/4.0)

Nov '20 — Nov '24

Lahore, Pakistan

- Relevant Coursework: Web Engineering, Database Systems, Software Engineering
